

Solvay Pharmaceuticals, Inc. to Discontinue Supplying ESTRATEST® Brand Tablets to U.S. Market

Solvay Pharmaceuticals, Inc. announced on March 10, 2009, that it would discontinue supplying the marketplace with ESTRATEST® (Esterified Estrogens and Methyltestosterone) Tablets and ESTRATEST® HS (Esterified Estrogens and Methyltestosterone) Tablets. Effective March 31, 2009, the company will no longer accept orders for new product from its customers. While the company recognizes these products serve as an important therapeutic alternative in the treatment of vasomotor menopausal symptoms and continues to stand behind their safety and efficacy, the decision was made based upon a variety of business factors. In the weeks and months ahead, women currently taking ESTRATEST® and ESTRATEST® H.S. should discuss other treatment options with their physicians.

Should you have questions about this matter, please contact Solvay Pharmaceuticals at the numbers provided below:
